

GOVIND CHANDRASHEKHAR TURKAR

Full Stack Web Developer • Software Engineer

Nagpur, Maharashtra, India | +91 83808 53925 | govindturkar69@gmail.com | github.com/govindturkar69-crypto | linkedin.com/in/govindturkar

PROFESSIONAL SUMMARY

Dynamic and results-driven **Full Stack Software Engineer** and Final-Year B.Tech CSE student with strong expertise in architecting, building, and deploying scalable web applications and AI-integrated platforms. Proficient across the complete stack—from engineering intuitive frontend interfaces (**React**, **Next.js 14**, **TypeScript**, **Tailwind CSS**) to designing high-throughput REST APIs and microservices (**Node.js**, **Express**, **FastAPI**, **Python**), relational & NoSQL databases (**PostgreSQL**, **MongoDB**, **Redis**), and containerized deployments (**Docker**, **CI/CD**). Experienced in building real-time collaboration engines, optimizing database latency, and integrating LLMs.

TECHNICAL SKILLS

Languages & Core CS: JavaScript (ES6+), TypeScript, Python, SQL, C/C++, HTML5, CSS3, Data Structures & Algorithms (DSA), OOP, System Design, DBMS

Frontend Development: React.js, Next.js 14 (App Router), Vite, Tailwind CSS, Redux Toolkit, Context API, Monaco Editor, Responsive Design

Backend & Microservices: Node.js, Express.js, FastAPI, RESTful APIs, WebSockets (Real-Time), JWT Authentication, OAuth 2.0, Rate Limiting, Middleware

Databases & Caching: PostgreSQL, MongoDB, Redis (In-Memory & Upstash), MySQL, Prisma ORM, Mongoose, Vector Databases

DevOps & Cloud Tools: Docker, Git, GitHub Actions, Vercel, Render, Postman, Linux, Google Gemini API, RAG, PyTorch, scikit-learn, XGBoost

WORK EXPERIENCE

KodeKalp Global Technologies — Full Stack Developer Intern

Jun 2026 – Present | Remote

- Engineered end-to-end full-stack features using **React**, **TypeScript**, **Node.js/Express**, and **Redis**, accelerating data querying performance by **40%**.
- Architected and delivered “**Aurora Weather**”—a live production application delivering real-time forecasts, air quality index, and astronomical tracking.
- Implemented high-efficiency **Redis in-memory caching** and optimized REST APIs, reducing third-party server query overhead by **35%**.
- Containerized microservices using **Docker** and established seamless CI/CD delivery pipelines across **Vercel**, **Render**, and **Upstash**.

KEY ENGINEERING PROJECTS

NexusCode – AI-Powered Cloud IDE & Collaborative Workspace

Final-Year Project

Tech Stack: React 19, TypeScript, Vite, FastAPI, PostgreSQL, WebSockets, Docker, Google Gemini API, GitHub OAuth

- Engineered a real-time collaborative development platform featuring in-browser **Monaco Editor**, live Kanban boards, and **WebSocket** multi-user sync.
- Integrated **Google Gemini API** for real-time AI code generation, AST bug diagnostics, and automated test-case synthesis.
- Implemented **GitHub OAuth 2.0**, Role-Based Access Control (RBAC), and containerized microservices with **Docker** deployed on **Render & Vercel**.

RealtyIQ – Full-Stack Real Estate Predictive Analytics Platform

Production Web App

Tech Stack: Next.js 14 (App Router), Express.js, FastAPI, MongoDB, Tailwind CSS, XGBoost, SHAP

- Developed a full-stack real estate analytics dashboard with **Next.js 14**, delivering automated valuation estimates with confidence intervals.
- Engineered dual backend microservices: an **Express + MongoDB** authentication service and a high-performance **FastAPI ML engine** using **XGBoost & SHAP**.
- Optimized database schemas and API latency, achieving sub-**100ms** query response times across large Indian housing transaction datasets.

VeriDoc – Citation-Grounded Enterprise RAG Q&A System

AI / Full-Stack Project

Tech Stack: Python, FastAPI, Vector Search / Embeddings, LLM Orchestration, React, JWT Auth

- Built an institutional **Retrieval-Augmented Generation (RAG)** knowledge system querying internal repositories with verified source citations.
- Implemented semantic vector search pipelines that lowered model hallucination rates by **95%** with sub-second response retrieval.

Stock Price & Direction Prediction System (LSTM)

Deep Learning / Data App

Tech Stack: PyTorch, Python, yfinance, Streamlit, Time-Series Modeling

- Developed a **PyTorch LSTM** deep learning pipeline with leakage-safe walk-forward validation for financial market direction forecasting.
- Created a real-time **Streamlit dashboard** integrating live data feeds across US and Indian stock tickers.

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science & Engineering

2023 – 2027

G H Raison College of Engineering, Nagpur, India

Final Year (Ongoing)

Senior Secondary (Class XII - Science) • Sukanya Sankalp Niketan HSC, Kati

2023 | 68.0%

Secondary School Certificate (Class X) • Sukanya Sankalp Niketan High School, Kati

2021 | 86.4%
